10 cents to Dive in the Cloud: Amazon's Elastic Computing Environment

Dr. Dan Melton, NPTLabs, LLC

**Friday, Sep 5th, 2008 in FH 557 at 3:00 pm
5 pm: Pizza 51 Happy Hour (Dan buys Pizza, you bring ideas)**

What Elastic means: Its 10pm: Launch Facebook application. 10:15pm: Traffic spike, boot up 3000 servers with one click (ok, two or three). 10:30pm: 1 million people used it. 10:45pm: Rush finished, end 2900 servers. 11:00pm: Have a beer (repeat).

Dan Melton, Ph.D.

Dan Melton, Ph.D., MPA is the Founder and Team Chief for NPTLabs, LLC, located in the Kansas City area. NPTLabs is a startup focusing on early stage rapid prototyping of web-driven projects focused on the public sector. As a public-minded, Generation Net, tech head, Dan brings a unique hybrid of business, web development and public sector experience to his partners and customers. His team's recent projects include Project CODE Monkey, a cloud-based or virtual coding environment for agile development; Urbata, an application to quickly grab customizable data using a simple drag and drop interface; and

Chatreach, a micro-marketing referral toolkit for organizations to conduct outreach in web-based social networking environments. **NPTLabs is recruiting interns to work on projects.**
